Construction

- Due Apr 25, 2023 by 11:59pm
- Points 25
- Submitting a text entry box or a file upload
- Available until May 2, 2023 at 11:59pm

This assignment was locked May 2, 2023 at 11:59pm.

Convert your class diagram into 'stub code'.

Your stub code can be any language you want, including but not limited to java, python, c++.

I would even accept Fortran IV, Fortran 77, COBOL, Basic, Pascal, ALGOL, PHP, PL/1, and PLMI if the code makes sense.

Your code does not need to run or do anything of consequence. It just needs to reflect the architecture described in your class diagram.
